

Stay ahead with modern technology

Enhance productivity and security with the latest Dell PCs, featuring Intel® Core™ Ultra processors and Windows 11 Pro.

As AI rapidly transforms industries, businesses must adapt quickly to stay competitive, manage complex workloads, and address evolving security threats. Transitioning to the latest devices provides the ideal solutions for the modern workforce.

Plan your transition now

- Windows 10 end-of-support is October 2025.
- Older devices may not meet Windows 11 requirements and will lack the latest performance and security enhancements.
- New built-in AI features are driving new levels of productivity.

Windows 11 brings up to

42%

faster to complete demanding workloads on average*

Take advantage of new capabilities

Empower your workforce with a full ecosystem solution of modern, secure and manageable devices, including the latest AI-enabled Dell Latitude PCs and Dell Precision workstations.

Increased productivity: AI-enhanced performance with new Intel® Core™ Ultra processors provides power efficiency and helps you complete tasks faster than 3 year old devices. Copilot in Windows* brings intelligent tools so you can work smarter.

Enhanced built-in security: Outdated hardware increases the risk of cyber-attacks. Reduce the attack surface and enhance long-term cyber resilience with Dell Trusted Workspace on our commercial PCs. Most secure Windows includes layers of hardware-backed protection enabled by default, including TPM 2.0.

Simplified management: Reduce costs and streamline operations with effective Dell Manageability Solutions. Let Dell Technologies manage and optimize your IT operations, freeing up resources for strategic projects and business growth.

Services

Device refresh and AI implementation should not be disruptive to your business. With over 35 years in partnership with Microsoft, Dell Technologies offers an extensive portfolio of professional services to empower your teams and help you realize the business outcomes you need.

Dell Managed Services for device refresh delivers a strategic PC refresh program that includes roll-out planning, procurement forecasting, end user communication and deployment automation.

Dell Implementation Services for Microsoft Copilot solutions help you accelerate adoption to maximize value, enabling more efficient ways of working with reduced risk.

Flexibility to transform IT with Dell APEX PC-as-a-Service

-  Invest in new technology easily with flexible payment options.
-  Simplify the daily burden of PC lifecycle management.
-  Improve the employee experience.
