

4 ways IT service partners move you from “work interrupted” to “IT disruptor”

Reclaim your time by aligning with a trusted technology partner. Discover how Lenovo helps ease your workload to jump-start your strategic impact.

Hover on the  in each section to learn more

1 Save time by modernizing your IT workflow

Easily deploy and configure devices anywhere with Lenovo Remote Work Enablement solutions.

Pre-configured end-user devices can ship straight from Lenovo, and employees can log in securely from anywhere — simplifying the onboarding process.

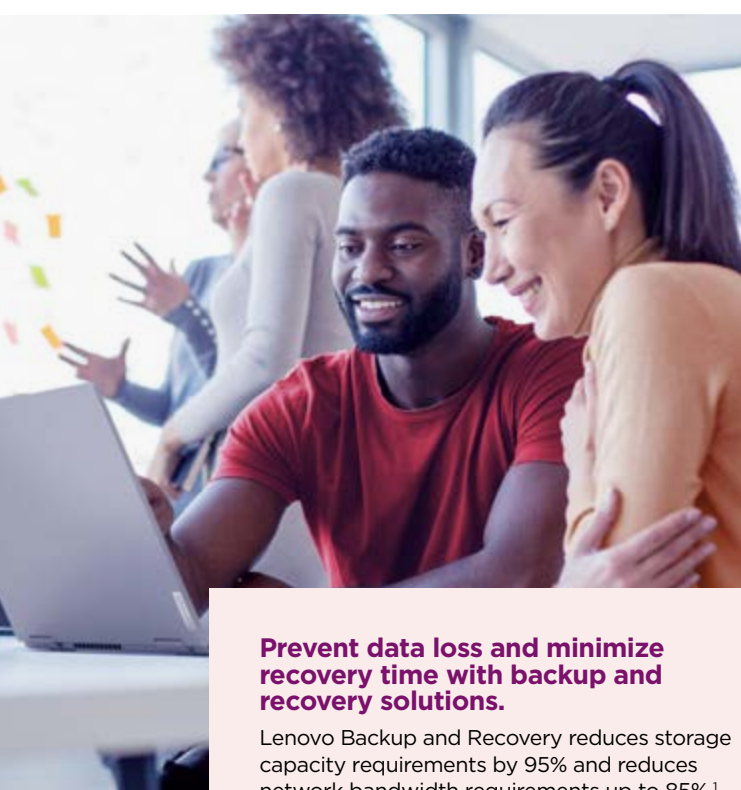

Get pay-as-you-go access to the latest technology, available as a service with Lenovo TruScale Device as a Service.

Your teams will always be optimally equipped the latest tech — like the ThinkPad® X1 Fold with Intel vPro®. An Intel® Evo™ Design powered by 12th Gen Intel® Core™ i7 processors — built for what IT needs and users want. Easily scale up to meet the demands of your business.

Scale efficiently with hybrid cloud.

Lenovo Hybrid Cloud solutions let you build a perimeter-less organization with ThinkAgile series appliances that supports teams in a mixed work environment.

Prevent data loss and minimize recovery time with backup and recovery solutions.

Lenovo Backup and Recovery reduces storage capacity requirements by 95% and reduces network bandwidth requirements up to 85%.¹

Simplify how you manage and monitor security 2

Guard endpoint security from every angle with Lenovo ThinkShield built-in endpoint tracking, encryption, and ID protection.

Intel vPro® platforms also include Intel® Hardware Shield for hardware-based multilayered security — with active monitoring against threats and attacks, extending protection beyond the OS.

Gain a higher level of visibility into your fleet with oversight from Lenovo Device Intelligence (LDI) Plus Managed Services.

We can monitor, maintain, and remediate all brands of PCs in your fleet, anywhere you have employees.

3 Get resources for your support team

Enable easy remote device management.

Lenovo Commercial Vantage makes it simple for IT teams to manage device settings, improve performance, troubleshoot, and perform routine maintenance.

Rely on elite Lenovo technicians to resolve issues quickly.

Lenovo Premier Support provides superior troubleshooting with 24/7/365 remote support and onsite SLA response times.

Team up for sustainability 4

Build sustainability into every purchase with Lenovo CO₂ Offset Services.

Compensate for each device's average lifecycle emissions by designating offsets to go toward UN-approved climate action projects such as renewable energy, solar power, and other ecological projects across the world.

Manage asset disposal securely and sustainably.

Lenovo Asset Recovery Services help you dispose of old technology in a responsible way, keeping it out of landfills while ensuring proper data destruction.

Lenovo's portfolio of digital workplace solutions can empower collaboration and enhance security for employees everywhere. [Learn more.](#)
